

Because every step matters.

ProLink™ is the most advanced electronic ankle monitor in the market. Designed for smart offender tracking, it reduces prison overcrowding and prevents recidivism. Moreover, its cutting-edge AIoT technology provides real-time location monitoring, making it an ideal solution for individuals in parole, probation, house arrest, and immigration control, as well as domestic violence offenders who require strict geofencing enforcement.

PROLINK 

WWW.PROLINKBAND.COM

ProLink™ offers a cost-effective, high-tech solution for law enforcement, correctional facilities, and immigration services, ensuring a safer and more efficient approach to electronic monitoring.

Tamper-Proof Design
Built with optical fiber sensors that trigger immediate alerts upon any tampering attempt.

Lightweight & Discreet
Weighing just 200g, designed for minimal visibility and maximum compliance.

Hypoallergenic Material
Comfortable for long-term wear, preventing skin irritation.

Key advantages

Next-Gen AIoT Technology
Uses a 2.4 GHz communication protocol, compatible with most smartphones.

Advanced Geofencing
Precisely defines restricted and allowed areas with real-time alerts.

Top-Tier Security
AES 256-bit encryption ensures data protection and system integrity.

Long Battery Life
Up to 1.5 years of operation without frequent recharging.

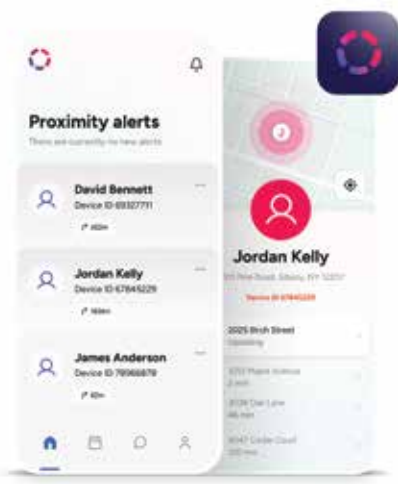

Bluetooth Integration
Securely managed opening via Bluetooth technology.

Collaborative network
Providing an enhanced and seamless location data sharing.

ProLink™ App & Platform

- Unlocking authorized by the operator responsible for monitoring the ankle bracelet wearers.
- Real-time monitoring and remote management capabilities enable operators to promptly respond to incidents.
- Unlocking performed via ProLink™ proprietary technology, ensuring secure and efficient access control.

Who we are

Promont and Group Link One have partnered to revolutionize security infrastructure management. Combining Promont's secure and scalable access control solutions, powered by the pioneering RedSquare® Bluetooth technology, with Group Link One's cutting-edge AIoT platform, the collaboration delivers unprecedented data-driven insights and advanced analytics for the safety market. Together, they set a new standard for efficiency and intelligent decision-making worldwide.
